- Presenting

### **PROJECTS**

#### 2023 6 months

#### **FPL Prediction**

- Web scrapped player data from Premier League, La Liga, Ligue 1 and Serie A databases, cleared, removed redundant values, converted into a .csv file and made a statistical model
- Using artificial neural network (ANN) and logistic regression (LR) techniques with Rapid Miner as a data mining tool with 85% and 93% prediction accuracy respectively and used PowerBI to visualize the model.

#### 2023 4 months

#### Website

- Created a fully responsive E-Commerce website using HTML, CSS, Javascript.
- The customers can order, view, add and delete items to the cart while the administrator can validate the order and check the delivery address and phone number.
- PHP is used to store the data and by using SQL relations between data can be build and can later be used for analytics.

#### 2023 4 months

## Amazon Sales Analysis | Personal Project

- Utilized data to extract data from 8 different related tables from customer sales databases using join and view.
- Transformed and filtered data using aggregating and filtering function to improve reporting process.
- Loaded and visualized data using python to identify key business intelligence that can improve the sales.

#### 2022 2 months

#### STOCK PRICE PREDICTION MODEL

- Predicted patterns, stability and possible returns percentage of stocks by analyzing numerous parameters that directly or indirectly affects the stock with pre existing data (21/22)
- Accuracy of the model was 63%

## **CERTIFICATIONS**

# **Education**

Oct 2022 | INFOSYS springboard **Python foundation** 

May 2023 | Cognitive class . **Data analysis with python**
